Short communication

Accuracy map of an optical motion capture system with 42 or 21 cameras in a large measurement volume

Alexander M. Aurand, Jonathan S. Dufour, William S. Marras

PII: S0021-9290(17)30258-0

DOI: <http://dx.doi.org/10.1016/j.jbiomech.2017.05.006>

Reference: BM 8226

To appear in: *Journal of Biomechanics*

Received Date: 25 January 2017

Revised Date: 12 April 2017

Accepted Date: 8 May 2017

Please cite this article as: A.M. Aurand, J.S. Dufour, W.S. Marras, Accuracy map of an optical motion capture system with 42 or 21 cameras in a large measurement volume, *Journal of Biomechanics* (2017), doi: <http://dx.doi.org/10.1016/j.jbiomech.2017.05.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Short Communication

Accuracy map of an optical motion capture system with 42 or 21 cameras in a large measurement volume

Alexander M. Aurand<sup>1</sup>, Jonathan S. Dufour<sup>1</sup>, William S. Marras<sup>1</sup>
