Subchondral Bone Microarchitecture and Failure Mechanism under Compression: A Finite Element Study

Fatemeh Malekipour, Denny Oetomo, Peter Vee-Sin Lee

PII: S0021-9290(17)30101-X

DOI: <http://dx.doi.org/10.1016/j.jbiomech.2017.02.005>

Reference: BM 8125

To appear in: *Journal of Biomechanics*

Accepted Date: 11 February 2017

Please cite this article as: F. Malekipour, D. Oetomo, P.V-S. Lee, Subchondral Bone Microarchitecture and Failure Mechanism under Compression: A Finite Element Study, *Journal of Biomechanics* (2017), doi: <http://dx.doi.org/10.1016/j.jbiomech.2017.02.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
