Higher Medially-directed Joint Reaction Forces are a Characteristic of Dysplastic Hips: A Comparative Study Using Subject-Specific Musculoskeletal Models

Michael D. Harris, Bruce A. MacWilliams, K. Bo Foreman, Christopher L. Peters, Jeffrey A. Weiss, Andrew E. Anderson

PII: S0021-9290(17)30068-4
DOI: <http://dx.doi.org/10.1016/j.jbiomech.2017.01.040>
Reference: BM 8112

To appear in: *Journal of Biomechanics*

Accepted Date: 28 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original Article (BM-D-16-00547)
