

Author's Accepted Manuscript

IMPETUS – Interactive MultiPhysics Simulation Environment

Vi Q. Ha, George Lykotrafitis

PII: S0021-9290(16)31143-5
DOI: <http://dx.doi.org/10.1016/j.jbiomech.2016.10.042>
Reference: BM7952

To appear in: *Journal of Biomechanics*
Accepted date: 25 October 2016

Cite this article as: Vi Q. Ha and George Lykotrafitis, IMPETUS – Interactive MultiPhysics Simulation Environment, *Journal of Biomechanics* <http://dx.doi.org/10.1016/j.jbiomech.2016.10.042>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

IMPETUS – Interactive MultiPhysics Simulation Environment

Vi Q. Ha¹ and George Lykotrafitis^{*1,2}

¹Mechanical Engineering, ²Biomedical Engineering, University of Connecticut, Storrs, CT 06269

^{*}Corresponding Author

Keywords:

Coarse-grain molecular dynamics, Emergence in complex systems, High-performance computing, Modular object oriented programming.

Word count: 3443

The manuscript is submitted as an Original Article
