This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A social identity analysis of responses to economic inequality

Jolanda Jetten¹, Zhechen Wang¹, Niklas K. Steffens¹, Frank Mols¹, Kim Peters¹,
& Maykel Verkuyten²

¹ University of Queensland

² University of Utrecht

Highlights

- Growing inequality has hidden costs for societies' social and political vitality.
- Economic inequality enhances wealth categorizations and 'us' versus 'them' dynamics.
- For inequality to be seen as a problem, it needs to be visible and appraised as unfair.
- The socio-structural context shapes perceptions whether inequality is perceived as unfair.
- Wealthy and poor groups responses to inequality reflect different concerns.
