This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**HIGHLIGHTS**

- We study a dynamic self-control model affected by past decisions.
- Past decisions produce effort and regret emotions that affect self-control.
- We explain switching consumption patterns of indulgence and restraint (and vice versa)
- The amplitude of this pattern increases with foresight.
- Unavoidable temptations affect future preferences, and pre-commitment decisions.
