Please check if appropriate. *Ab*(2017), doi: [10.1016/j.addbeh.2017.06.019](https://doi.org/10.1016/j.addbeh.2017.06.019)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Motivations for reducing alcohol consumption: An international survey exploring experiences that may lead to a change in drinking habits

Emma L Davies¹, Dominic Conroy², Adam R Winstock^{3,4}, Jason Ferris^{3,5}

1. Department of Psychology, Social Work and Public Health, Oxford Brookes University, Gypsy Lane, Oxford, UK, edavies@brookes.ac.uk

2. Department of Psychological Sciences, Birkbeck University of London, UK

3. Global Drug Survey, London, UK

4. University College London, UK

5. Institute for Social Science Research, University of Queensland, Brisbane, Australia

Corresponding author: Emma L Davies telephone number 01865 484056

Keywords: alcohol; reducing drinking; behaviour change; brief interventions

Word count: 3492

Statement of contribution: ED performed the statistical analyses and drafted the manuscript. AW and JF developed and directed the survey, and collected the data. JF advised on and performed statistical analyses. DC performed the literature review, assisted with the statistical analysis and contributed to early drafts of the manuscript. All authors contributed to, edited and approved the final manuscript.

Conflicts of interest: AW is the founder and owner of Global Drug Survey. JF is the GDS chief biostatistician.

Ethics approval: The Psychiatry, Nursing and Midwives Ethics subcommittee at Kings College, London.
