

Accepted Manuscript

Title: Visual reminders of death enhance nociceptive-related cortical responses and event-related alpha desynchronisation

Authors: Elia Valentini, Valentina Nicolardi, Salvatore Maria Aglioti

PII: S0301-0511(17)30211-9
DOI: <http://dx.doi.org/10.1016/j.biopsycho.2017.08.055>
Reference: BIOPSY 7424

To appear in:

Received date: 22-11-2016
Revised date: 18-8-2017
Accepted date: 27-8-2017

Please cite this article as: Valentini, Elia, Nicolardi, Valentina, Aglioti, Salvatore Maria, Visual reminders of death enhance nociceptive-related cortical responses and event-related alpha desynchronisation. *Biological Psychology* <http://dx.doi.org/10.1016/j.biopsycho.2017.08.055>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Visual reminders of death enhance nociceptive–related cortical responses and event-related alpha desynchronisation
