The impact of affirmative action: Evidence from a cross-country laboratory experiment

Uwe Dulleck, Yumei He, Michael P. Kidd, Juliana Silva-Goncalves

PII: S0165-1765(17)30106-4

DOI: <http://dx.doi.org/10.1016/j.econlet.2017.03.010>

Reference: ECOLET 7545

To appear in: *Economics Letters*

Received date: 4 January 2017

Revised date: 20 February 2017

Accepted date: 12 March 2017

Please cite this article as: Dulleck, U., et al., The impact of affirmative action: Evidence from a cross-country laboratory experiment. *Economics Letters* (2017), <http://dx.doi.org/10.1016/j.econlet.2017.03.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- A synchronous cross country laboratory experiment between Australia and China
- Implicit association test confirms existence of a negative stereotype
- Affirmative action tries to compensate for the disadvantage
- Impact of affirmative action on effort depends on specific context
