This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. We study assignment problems where individuals trade packages of several objects.
2. We introduce a linear program to identify whether the core is empty.
3. The pricing equilibrium always coincides with the core when it is not empty.
