This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights (for review)**

- We investigate the causal impact of equity market liberalizations on sectoral export performance
- Increased availability of external finance boosts trade of industries intensively using relationship-specific inputs
- Exports of industries using standardized inputs decline
- Suggests that financial reforms generate winners and losers
