This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

HIGHLIGHTS

- We test the rating shopping hypothesis for triple A senior European RMBS
- Findings do not support rating shopping hypothesis for the pre-2007 period
- The number of ratings is positively related to the new issuance spread
- Findings question EU requirement that more complex securities have two ratings
