Received date: 6 March 2016

Please cite this article in press as: Haruvy, E., et al. Communication and visibility in public goods provision. *Games Econ. Behav.* (2017), <http://dx.doi.org/10.1016/j.geb.2017.08.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We investigate a public goods game in virtual world and zTree environments.
- We investigate how communication and visibility affect public good contributions.
- Communication significantly and consistently improves public good contributions.
- Communication and visibility are complements in the virtual world environment.
- Positive reinforcement and monitoring have a positive impact on cooperation.
