The Economic Impact of Supply Chain Disruptions from the Great East-Japan Earthquake

May 2016

Joji TOKUI (Shinshu University and RIETI),

Kazuyasu KAWASAKI (Toyo University),

Tsutomu MIYAGAWA (Gakushuin University and RIETI),

This paper is the revised version of “The Economic Impact of Supply Chain Disruptions from the Great East Japan Earthquake” (RIETI Discussion Paper Series 15-E-094). Originally, this paper was written for the project: “The Economic Effects of the Great East-Japan Earthquake” supported by the Center for Global Partnership, the Japan Foundation, the University of Southern California and Gakushuin University. We thank an anonymous referee for his excellent comments. We also thank Robert Dekle (University of Southern California), Jonathan Eaton (Pennsylvania State University), Theresa Greaney (University of Hawaii), Douglas Joines (University of Southern California), Etsuro Shioji (Hitotsubashi University), and Eric Weese (Yale University) and the participants of the three workshops on the Great East-Japan Earthquake held at Gakushuin University, Research Institute of Economy, Trade, and Industry, and the University of Southern California for their invaluable comments. We also thank the Central Research Institute of Electric Power Industry for providing us with the prefectural-level multiregional IO tables. This study is supported in part by the Grant-in-Aid for Scientific Research from the Ministry of Education, Culture, Sports, Science and Technology (No.25285072, No.24530296, No.26380322, and 15H03351) of Japan.
