This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- This paper investigates the effect of trust on delegation.
- We first develop a simple model that yields directly testable implications.
- Our OLS and 2SLS results show that trust has positive effect on delegation.
- The effect of trust is increasing in economic sophistication.
