This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We investigate public investment in education, health and infrastructure in Indonesia
- Fiscal decentralization made investments more responsive to gaps in local services
- Early democratization without spending powers put limits on investment expansion
- Direct elections of district heads did not improve investment targeting
- Investment expenditures decreased under directly elected heads
