This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Institutional reform improves access to credit to finance the capital imports.
- External finance intensive firms benefit most from better institutions.
- First-time importers may particularly benefit from better institutions.
- The input import decision is not subject to credit constraints.
