This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Values of some proxies of political-economic development come with standard errors.
- Existing empirical work discards the information provided by the standard errors.
- Multiple imputation can be used to take into account this additional information.
- Adopting this approach can have a large influence on empirical results.
