This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The bond issue-price increases with the proximity of contributing underwriters.
- The bond issue-price decreases with the lead-underwriter's relative contributions.
- The political support result is not as robust as the financial influence result.
- The fee difference between contributing underwriters and other underwriters is 2.9%.
- The results are statistically insignificant in the presence of underwriter auctions.
