This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Highlights

- 2 • One dollar of government bonds crowds out private bonds by less than one dollar.
- 3 • The crowding-out coefficient for a tax cut is decreasing in the size of the tax cut.
- 4 • The crowding-out coefficient for a tax hike is increasing in the size of the hike.
- 5 • The crowding-out coefficient for a tax hike is at least as large as for a tax cut.
- 6 • In the US, the crowding-out coefficient is about 0.75 under Ricardian Equivalence.
