This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- A decision theoretic model of conflict inspired by Art of War is investigated.
- The basic trade-off is obtaining an option value and giving the opponent the same.
- Aggressiveness and patience is connected to whether a secure position was obtained.
- A secure position can be the result of the odds favoring a player.
- A secure position can also be the result of the opponent not being aggressive.
