This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

***Highlights (for review)**

Highlights

- Non-extensive statistical mechanics appropriately describes complex systems.
- We apply Tsallis entropy to ranks the terms' relevance to document subject.
- Experimental evaluations confirm the capability of this metric in keyword detection.
- This metric has reliable word ranking results in comparison with previous methods.
