

## Accepted Manuscript

Avalanches and generalized memory associativity in a network model for conscious and unconscious mental functioning

Maheen Siddiqui, Roseli S. Wedemann, Henrik Jeldtoft Jensen

PII: S0378-4371(17)30728-8

DOI: <http://dx.doi.org/10.1016/j.physa.2017.08.011>

Reference: PHYSA 18457

To appear in: *Physica A*

Received date : 10 April 2017

Revised date : 16 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights for the manuscript

### *Avalanches and Generalized Memory Associativity in a Network Model for Conscious and Unconscious Mental Functioning*

by M. Siddiqui, R.S. Wedemann, and H. J. Jensen.

- Generalized Simulated Annealing (GSA) is applied to Neural Networks.
- GSA and the Boltzmann Machine are compared.
- Avalanches in memory retrieval follow q-exponentials.
- Asymptotic power-laws are observed, as in fMRI measurements.
