This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Investigate dynamics of personal income for 5 consecutive years in china.
- Increasing trend of the standard deviation of income growth rate is observed in high income groups.
- Increasing variance of income growth rates has important impact on power law tail generation.
