

## Accepted Manuscript

The influence of contrarians in the dynamics of opinion formation

Joao Paulo Gambaro, Nuno Crokidakis

PII: S0378-4371(17)30558-7

DOI: <http://dx.doi.org/10.1016/j.physa.2017.05.040>

Reference: PHYSA 18326

To appear in: *Physica A*

Received date: 16 March 2017

Please cite this article as: J.P. Gambaro, N. Crokidakis, The influence of contrarians in the dynamics of opinion formation, *Physica A* (2017), <http://dx.doi.org/10.1016/j.physa.2017.05.040>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

==> Highlights

- \* Contrarian behavior acts as a disorder in the model
- \* Possibility to suppress the phase transition
- \* Occurrence of a tricritical point
- \* Universality class of the equilibrium Ising model
