This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

Highlights:

We reformulate Barro-Gordon Game using quantum game theory.

We use Marinatto-Weber approach for quantization of game theory.

We find that the well-known time inconsistency in the classical game is removed after quantization.
