

## Accepted Manuscript

Multi-objective optimization model and evolutionary solution of network node matching problem

Xiangjuan Yao, Dunwei Gong, Peipei Wang, Lina Chen

PII: S0378-4371(17)30396-5

DOI: <http://dx.doi.org/10.1016/j.physa.2017.04.094>

Reference: PHYSYA 18196

To appear in: *Physica A*

Received date: 12 September 2016

Revised date: 13 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

1. Established a multi-objective mathematic model for the node matching problem by considering multiple evaluation criteria.
2. Presented an evolutionary algorithm to solve the mathematic model.
3. Applied the proposed method to some typical networks to evaluate its performance.
