This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Cover letter and Highlights

Highlights

- Heart disease diagnosis system is proposed.
- Probabilistic Principal Component Analysis is used for feature extraction
- Parallel Analysis is performed for Principal Component selection.
- RBF kernel based SVM is used for classification.
