

## Accepted Manuscript

Extended resource allocation index for link prediction of complex network

Shuxin Liu, Xinsheng Ji, Caixia Liu, Yi Bai

PII: S0378-4371(17)30199-1

DOI: <http://dx.doi.org/10.1016/j.physa.2017.02.078>

Reference: PHYSA 18058

To appear in: *Physica A*

Received date: 23 April 2016

Revised date: 31 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- 1) Similarity of endpoints depends on the potential resource interacted between them
- 2) Resource transferred by common neighbors and non-common neighbors are considered
- 3) It's a self-adaptive similarity index by adjusting the resource of longer paths
- 4) This method proposed is very suitable for large-scale networks
- 5) It is well performed under two standard metrics AUC and precision
