

## Accepted Manuscript

Learning and retrieval behavior in recurrent neural networks with pre-synaptic dependent homeostatic plasticity

Beatriz E.P. Mizusaki, Everton J. Agnes, Rubem Erichsen, Jr., Leonardo G. Brunnet

PII: S0378-4371(17)30175-9

DOI: <http://dx.doi.org/10.1016/j.physa.2017.02.035>

Reference: PHYSA 18015

To appear in: *Physica A*

Received date: 20 September 2016

Revised date: 11 January 2017

Please cite this article as: B.E.P. Mizusaki, et al., Learning and retrieval behavior in recurrent neural networks with pre-synaptic dependent homeostatic plasticity, *Physica A* (2017), <http://dx.doi.org/10.1016/j.physa.2017.02.035>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A network of spiking neurons is capable of storing spatio-temporal information.
- A correlation measure to evaluate the quality of the memory retrieved is proposed.
- The storage capacity is evaluated for varied durations of activity traces.
- The time length of inhibitory signals affect the reliability of memory retrieval.
