This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We numerically investigate the zebra skin pattern formation on a zebra model.
- We use Lengyel--Epstein model: a two component activator and inhibitor system.
- We provide computational experiments to study the pattern formation.
