This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Investigating Market Efficiency through a Forecasting Model based on Differential Equations

Highlights

- A new framework for stock price trend forecast is proposed.
- Information about future price is found in the series analyzed.
- Market efficiency is investigated.
- Application of the model as part of trading strategy is discussed.
