To appear in: *Physica A*

Received date: 29 July 2016

Revised date: 21 December 2016

Please cite this article as: M.J. Hay, et al., On extreme points of the diffusion polytope, *Physica A* (2017), <http://dx.doi.org/10.1016/j.physa.2017.01.038>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Revised Highlights.

A class of discrete, deterministic diffusion processes on graphs is introduced

The set of attainable population vectors is studied, with focus on its extreme points

Explicit results are obtained for complete graphs, path graphs and cyclic graphs
