This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Present a new *SIB* model of e-commerce preferential information on scale-free networks.
- Obtain the basic reproductive number and the equilibriums.
- Study the stability of equilibriums and the permanence of preferential information.
- Attractive parameter can affect the spreading of preferential information.
