This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- > We study credit risk in Nicaraguan agricultural micro loans.
- > We use a data set from a small Nicaraguan microfinance institution.
- > The research method accounts for the clustered data structure with crossed random effects.
- > We find that the economic objective of the loans influences the credit risk.
- > We find no gender effect regarding the credit risk.
