This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Benchmarking Macroprudential Policies: An Initial Assessment*

[This draft: August 2016]

Domenico Lombardi, CIGI

Pierre L. Siklos, WLU, BSIA, and CIGI

*This is a CIGI-sponsored research project. The opinions in the paper are those of the authors and not the institutions that supported this research. Domenico Lombardi is Director of the Global Economy program at CIGI, Pierre Siklos is a CIGI Senior Fellow, and Professor of Economics at Wilfrid Laurier University and the Balsillie School of International Affairs. Samuel Howorth provided excellent research assistance. Part of the research was conducted while Siklos was a W. Glenn Campbell and Rita Ricardo Campbell National Fellow at the Hoover Institution, Stanford University, whose hospitality is gratefully acknowledged. We are grateful for the constructive comments from Malcolm Knight and two anonymous referees. Previous versions were presented at 6th Annual Conference, “Monetary and Financial Shifts: Challenges and Possible Outcomes” of the Central Reserve Bank of Peru, as well as the CIGI-Oliver Wyman conference, “Unconventional Monetary Policies and Financial Stability: Implications for Banks and Financial Markets.” We are also grateful to the BIS for access to a database of central bank legislation and organization charts.
