This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights:**

- The field of FTA studies needs to adopt Mixed Methods approach to combine the cycles of deductive and inductive logic.
- Triangulation, where foresight experts use more than one method or source of data in the study of social phenomena, is a useful tool for the FTA community and futures research, in general.
- The FTA community members must have a higher level of methodological know-how and they should use qualitative methods in multi-faceted (external and internal) ways.
- Critical methodological approaches should be taken into serious consideration in participatory foresight studies. The article presents methodological guidelines for participatory foresight studies.
