

## Accepted Manuscript

Title: Analytical strategies for organic food packaging contaminants

Author: Yovana Sanchis Vicent Yusà Clara Coscollà

PII: S0021-9673(17)30173-5  
DOI: <http://dx.doi.org/doi:10.1016/j.chroma.2017.01.076>  
Reference: CHROMA 358255

To appear in: *Journal of Chromatography A*

Received date: 7-9-2016  
Revised date: 12-1-2017  
Accepted date: 26-1-2017

Please cite this article as: Yovana Sanchis, Vicent Yusgravea, Clara Coscollgravea, Analytical strategies for organic food packaging contaminants, *Journal of Chromatography A* (2017), <http://dx.doi.org/10.1016/j.chroma.2017.01.076>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## HIGHLIGHTS

- A review on analytical strategies for compounds in food and materials is described
- A tendency to integrate extraction and clean-up techniques was found
- SLE, PLE, SPME, FUSLE and Quechers are frequently used in package and food
- A trend towards the use of LC-HRMS for target and non-target analysis was observed
