Title: Validation of Molecularly Imprinted Polymers for side chain selective phosphopeptide enrichment

Author: Jing Chen Sudhirkumar Shinde Prabal Subedi Celina Wierzbicka Börje Sellergren Stefan Helling Katrin Marcus

PII: S0021-9673(16)31350-4
DOI: <http://dx.doi.org/doi:10.1016/j.chroma.2016.10.018>
Reference: CHROMA 357966

To appear in: *Journal of Chromatography A*

Received date: 16-3-2016
Revised date: 12-9-2016
Accepted date: 8-10-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Validation of Molecularly Imprinted Polymers for side chain selective phosphopeptide enrichment

Highlights

- Molecularly imprinted polymer assisted phosphopeptide enrichment demonstrates crucial improvements (side selectivity, affinity, minute sample amounts) with respect to state of the art phosphopeptide enrichment tools (TiO₂ and pY- antibodies).
