Title: Identification of metabolites of vindoline in rats using ultra-high performance liquid chromatography/quadrupole time-of-flight mass spectrometry

Authors: Yuqian Zhang, Yupeng Sun, Xiyan Mu, Lin Yuan, Qiao Wang, Lantong Zhang

PII: S1570-0232(17)30272-6
DOI: <http://dx.doi.org/doi:10.1016/j.jchromb.2017.05.038>
Reference: CHROMB 20627

To appear in: *Journal of Chromatography B*

Received date: 19-2-2017
Revised date: 27-5-2017
Accepted date: 30-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Identification of metabolites of vindoline in rats using ultra-high performance liquid chromatography/quadrupole time-of-flight mass spectrometry

Highlights First report on metabolism study of vindoline *in vivo* and *in vitro* of rats.

1. 25 metabolites were identified by comparing the changes with the parent drug, including 2 sulfate conjugates.
