

## Accepted Manuscript

Title: Development and validation of a liquid chromatographic method for the analysis of squaric acid dibutyl ester and its impurities

Authors: Marwa F. Mansour, Peixi Zhu, Ann Van Schepdael, Erwin Adams

PII: S0731-7085(17)30451-X  
DOI: <http://dx.doi.org/doi:10.1016/j.jpba.2017.04.022>  
Reference: PBA 11220

To appear in: *Journal of Pharmaceutical and Biomedical Analysis*

Received date: 22-2-2017  
Revised date: 13-4-2017  
Accepted date: 15-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Development and validation of a liquid chromatographic method for the analysis of  
squaric acid dibutyl ester and its impurities**

Fax: +32-16-323448

Tel.: +32-16-323444

**Highlights**

- First time that a quality control LC method is described for squaric acid dibutyl ester (SADBE).
- Method is simple, short, selective and robust.
- Characterization of SADBE and its forced degradation products by LC-MS.
