Title: UPLC–MS/MS method for the simultaneous quantification of three new antiretroviral drugs, dolutegravir, elvitegravir and rilpivirine, and other thirteen antiretroviral agents plus cobicistat and ritonavir boosters in human plasma

Authors: Marco Simiele, Alessandra Ariaudo, Amedeo De Nicolò, Fabio Favata, Martina Ferrante, Chiara Carcieri, Stefano Bonora, Giovanni Di Perri, Antonio D'Avolio

PII: S0731-7085(16)31453-4
DOI: <http://dx.doi.org/doi:10.1016/j.jpba.2017.02.002>
Reference: PBA 11065

To appear in: *Journal of Pharmaceutical and Biomedical Analysis*

Received date: 20-12-2016
Revised date: 30-1-2017
Accepted date: 1-2-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: UPLC-MS/MS method for the simultaneous quantification of three new antiretroviral drugs, dolutegravir, elvitegravir and rilpivirine, and other thirteen antiretroviral agents plus cobicistat and ritonavir boosters in human plasma.

Short Title: UPLC-MS/MS method for quantification of new antiretroviral agents

Authors: Marco Simiele^{1,2,*}, Alessandra Ariaudo^{1*}, Amedeo De Nicolò¹, Fabio Favata¹, Martina Ferrante¹, Chiara Carcieri¹, Stefano Bonora¹, Giovanni Di Perri¹ and Antonio D'Avolio¹.

*both authors equally contributed to this work
