

## Accepted Manuscript

Neutrophil proteomic analysis reveals the participation of antioxidant enzymes, motility and ribosomal proteins in the prevention of ischemic effects by preconditioning

S. Arshid, M. Tahir, B. Fontes, E.F.S. Montero, M.S. Castro, S. Sidoli, V. Schwämmle, P. Roepstorff, W. Fontes

PII: S1874-3919(16)30209-3  
DOI: doi: [10.1016/j.jprot.2016.05.016](https://doi.org/10.1016/j.jprot.2016.05.016)  
Reference: JPROT 2557

To appear in: *Journal of Proteomics*

Received date: 29 January 2016  
Revised date: 5 April 2016  
Accepted date: 14 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Neutrophil proteomic analysis reveals the participation of antioxidant enzymes, motility and ribosomal proteins in the prevention of ischemic effects by preconditioning.**
