Comparative study of ferrate and thermally activated persulfate treatments for removal of mono- and dichlorobenzenes from groundwater

Péter Dobosy, Cseperke Éva Vizsolyi, Imre Varga, József Varga, Győző Láng, Gyula Záray

PII: S0026-265X(16)30468-4
DOI: doi:[10.1016/j.microc.2016.10.015](https://doi.org/10.1016/j.microc.2016.10.015)
Reference: MICROC 2592

To appear in: *Microchemical Journal*

Received date: 14 September 2016
Revised date: 14 October 2016
Accepted date: 16 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparative study of ferrate and thermally activated persulfate treatments for removal of mono- and dichlorobenzenes from groundwater

Péter Dobosy; Cseperke Éva Vizsolyi; Imre Varga; József Varga; Győző Láng; Gyula Záray

Department of Analytical Chemistry, Eotvos Lorand University, H-1117, Budapest
