Combination of molecularly imprinted polymers and carbon nanomaterials as a versatile biosensing tool in sample analysis: Recent applications and challenges

Saeedeh Ansari

PII: S0165-9936(17)30136-X

DOI: [10.1016/j.trac.2017.05.015](https://doi.org/10.1016/j.trac.2017.05.015)

Reference: TRAC 14934

To appear in: *Trends in Analytical Chemistry*

Received Date: 17 April 2017

Revised Date: 31 May 2017

Accepted Date: 31 May 2017

Please cite this article as: S. Ansari, Combination of molecularly imprinted polymers and carbon nanomaterials as a versatile biosensing tool in sample analysis: Recent applications and challenges, *Trends in Analytical Chemistry* (2017), doi: 10.1016/j.trac.2017.05.015.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
