This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

Ethylene sulfite based electrolyte for non-aqueous lithium oxygen batteries

Chaolun Wu, Chen-Bo Liao, Lei Li*, Jun Yang

Shanghai Key Laboratory of Electrical Insulation and Thermal Aging, School of Chemistry and Chemical Engineering, Shanghai Jiaotong University, Shanghai 200240, China

An ethylene sulfite based electrolyte was used in non-aqueous lithium-oxygen batteries, and the batteries showed high specific capacity, good round-trip efficiency and cycling stability.
