Enhanced light-outcoupling in organic light-emitting diodes through a coated scattering layer based on porous polymer films

Hyeck Go, Tae-Wook Koh, Hyunsu Jung, Cheol Young Park, Tae-Won Ha, Eun Mi Kim, Moon Hee Kang, Yong Hyun Kim, Changhun Yun

PII: S1566-1199(17)30200-8

DOI: [10.1016/j.orgel.2017.05.009](https://doi.org/10.1016/j.orgel.2017.05.009)

Reference: ORGELE 4080

To appear in: *Organic Electronics*

Received Date: 3 February 2017

Revised Date: 6 April 2017

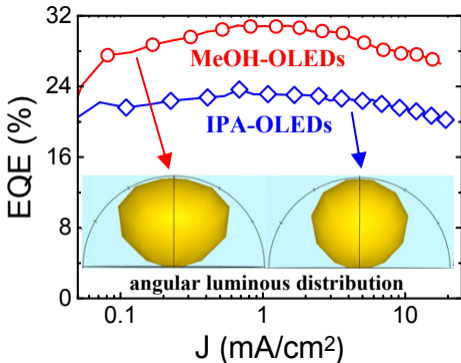

Accepted Date: 5 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Porous outcoupling layer
(immersion precipitation)**
