Solution-processed organic light-emitting diodes with emission from a doublet exciton; using (2,4,6-trichlorophenyl)methyl as emitter

Eric Neier, Renzo Arias Ugarte, Nader Rady, Swaminathan Venkatesan, Todd W. Hudnall, Alexander Zakhidov

PII: S1566-1199(17)30064-2

DOI: [10.1016/j.orgel.2017.02.010](https://doi.org/10.1016/j.orgel.2017.02.010)

Reference: ORGELE 3966

To appear in: *Organic Electronics*

Received Date: 20 December 2016

Revised Date: 8 February 2017

Accepted Date: 9 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
