Impact of Ligands and Media on the Structure and Properties of Biological and Biomimetic Iron-Sulfur Clusters

Shun Ohta, Yasuhiro Ohki

PII: S0010-8545(16)30516-1  
DOI: <http://dx.doi.org/10.1016/j.ccr.2017.02.018>  
Reference: CCR 112406

To appear in: *Coordination Chemistry Reviews*

Received Date: 14 December 2016  
Revised Date: 23 February 2017  
Accepted Date: 23 February 2017

Please cite this article as: S. Ohta, Y. Ohki, Impact of Ligands and Media on the Structure and Properties of Biological and Biomimetic Iron-Sulfur Clusters, *Coordination Chemistry Reviews* (2017), doi: <http://dx.doi.org/10.1016/j.ccr.2017.02.018>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Impact of Ligands and Media on the Structure and Properties of Biological and Biomimetic Iron-Sulfur Clusters

## Contents

1. Introduction
2. Influence of Ligands and Hydrogen Bonding on the Properties of Biological Iron-Sulfur Clusters
  - 2.1. The Importance of Hydrogen Bonding
  - 2.2. Representative non-Cysteinylyl Ligands and their Roles
    - 2.2.1. Histidine Ligation
    - 2.2.2. Carboxylate Ligation
    - 2.2.3. Peptide Amide Group as a Supporting Ligand
3. Effect of Ligands and Media on the Synthesis of Biomimetic Iron-Sulfur Clusters
  - 3.1. Synthesis of Iron-Sulfur Clusters via Salt Metathesis Reactions in Polar Solvents
