Title: Application of 1,2,4-triazolo[1,5-*a*]pyrimidines for the design of coordination compounds with interesting structures and new biological properties

Author: Iwona Łakomska, Marzena Fandzloch

PII: S0010-8545(15)30134-X

DOI: <http://dx.doi.org/doi: 10.1016/j.ccr.2016.04.014>

Reference: CCR 112243

To appear in: *Coordination Chemistry Reviews*

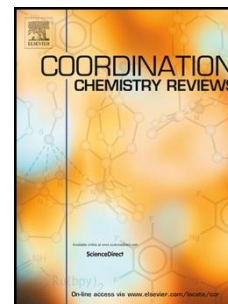

Received date: 18-12-2015

Revised date: 20-4-2016

Accepted date: 25-4-2016

Please cite this article as: Iwona Łakomska, Marzena Fandzloch, Application of 1,2,4-triazolo[1,5-*a*]pyrimidines for the design of coordination compounds with interesting structures and new biological properties, *Coordination Chemistry Reviews* (2016), <http://dx.doi.org/doi: 10.1016/j.ccr.2016.04.014>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Application of 1,2,4-triazolo[1,5-*a*]pyrimidines for the design of coordination compounds with interesting structures and new biological properties

Iwona Łakomska<sup>\*</sup>, Marzena Fandzloch

*Bioinorganic Chemistry Research Group, Faculty of Chemistry, Nicolaus Copernicus  
University in Toruń, Gagarina 7, 87-100 Toruń, POLAND*

*Dedicated to Professor Henryk Kozłowski with the very best wishes from the authors for all his future endeavors  
and with a deep appreciation of his friendship*

## Contents

Abstract	1
1. Introduction	2
2. Monodentate mode N3	5
2.1. Platinum(II), palladium(II) and platinum(IV) complexes	5
2.2. Ruthenium(II/III) and iron(II) complexes	7
2.3. Zinc(II) and cadmium(II) complexes	10
2.4. Copper(II) complexes	14
2.5. Cobalt(II), nickel(II), manganese(II) and tin(IV) complexes	16
3. Bridging modes	18
3.1. N3,N4-bridging mode	18
3.1.1. Silver(I) complexes	18
3.1.2. Platinum group metal complexes	21
3.1.3. Copper(II/I) complexes	23
3.1.4. Manganese(II) and zinc(II) complexes	25
3.2. N3,N1-bridging mode	26
4. Unusual mode of triazolopyrimidine coordination	29
5. Medical application of coordination compounds containing 1,2,4-triazolo[1,5- <i>a</i> ]pyrimidine derivatives	33
5.1. Cytotoxic activity against several cancer cell lines	33
5.2. Antiparasitic activity	38
5.3. Antimicrobial activity	44
6. Conclusions	48
References	50
Appendix A	55
